## Level 2 Mathematics, 2007

### 90286 Find and use straightforward derivatives and integrals

Credits: Four

2:00 pm Thursday 29 November 2007

Check that the National Student Number (NSN) on your admission slip is the same as the number at the top of this page.

Make sure you have a copy of Formulae Sheet L2-MATHF.

You should answer ALL the questions in this booklet.

Show ALL working. For every question you are required to show differentiation or integration. Calculator answers alone are not sufficient.

If you need more space for any answer, use the page(s) provided at the back of this booklet and clearly number the question.

Check that this booklet has pages 2–7 in the correct order and that none of these pages is blank.

**YOU MUST HAND THIS BOOKLET TO THE SUPERVISOR AT THE END OF THE EXAMINATION.**

For Assessor's use only		Achievement Criteria	
Achievement		Achievement with Merit	Achievement with Excellence
Find and use straightforward derivatives and integrals.	<input type="checkbox"/>	Apply calculus techniques to solve straightforward problems.	<input type="checkbox"/>
Overall Level of Performance			<input type="checkbox"/>

You are advised to spend 30 minutes answering the questions in this booklet.

### QUESTION ONE

The **gradient function** of a curve is  $f'(x) = 3x^2 - 8x + 1$ .

The curve passes through the point (2, 6).

Find the equation of the curve.

---

---

---

---

---

---

---

---

### QUESTION TWO

The point  $P(-2, 4)$  lies on the curve  $y = x^3 - 5x + 2$ .

Find the gradient of the tangent to the curve at point P.

---

---

---

---

---

---

---

---

**QUESTION THREE**

The curve has the equation  $y = x^2 - 2x + 4$ .

Calculate the shaded area.

---

---

---

---

---

---

---

---

---

---

**QUESTION FOUR**

A parabola has equation  $y = \frac{1}{4}x(12 - x) = 3x - \frac{1}{4}x^2$ .

Find the value of  $x$  where the slope of the curve is 3.5

---

---

---

---

---

---

---

---

---

---

**QUESTION FIVE**

Water is being added to a trough.

The volume  $V$  litres of water in the trough is given by

$$V = 9h + 0.025h^2$$

where  $h$  is the depth of water in centimetres.

Find the rate of change of the volume, with respect to  $h$ , when the water has a depth of 15 cm.

---

---

---

---

---

**QUESTION SIX**

A motorcycle is traveling at a speed of 18 m/s when it passes police checkpoint P.

It begins to decelerate. Its acceleration  $a$  m/s<sup>2</sup> until it stops is given by

$$a = -2$$

How many seconds after passing P did the motorcycle take to stop?

---

---

---

---

---

---

---

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Mathematics 90286, 2007

The area bounded by the curve  $y = 2x^2 - 3x - 2$  and the lines  $y = kx - 2$  and  $x = 2$  is shown by the shaded area.

The graph shows a coordinate system with a horizontal x-axis and a vertical y-axis. A parabola opens upwards, with its vertex in the third quadrant. A secant line passes through the parabola at two points in the first quadrant. The region between the parabola and the secant line, bounded by the y-axis and the secant line, is shaded in gray. The x-axis is labeled 'x' at its right end, and the y-axis is labeled 'y' at its top end. There are also two additional lines extending from the origin: one is a straight line passing through the first quadrant, and the other is a curve starting from the origin and curving upwards into the first quadrant.

**Extra paper for continuation of answers if required.  
Clearly number the question.**
